LOS ANGELES • EFFECTIVE NOVEMBER 9, 1975

M U N I C I P A L W A

DOMESTIC, COMMERCIAL AND INDUSTRIAL

Customer Charge

Size of Meter:

1 inch & smaller:	6 inch	\$ 43.00
Domestic\$ 2.25	8 inch	55.00
Commercial &	10 inch	127.00
Industrial 4.10	12 inch	222.00
1-1/2 inch 6.10	14 inch	280.00
2 inch 8.50	16 inch	335.00
3 inch 24.00	18 inch	395.00
4 inch 29.00	20 inch	450.00

Commodity Charge (City Rates)

First 35,000 cu. ft.....	29.8 cents per 100 cu. ft.
Next 300,000 cu. ft.	27.8 cents per 100 cu. ft.
Over 335,000 cu. ft.	25.6 cents per 100 cu. ft.

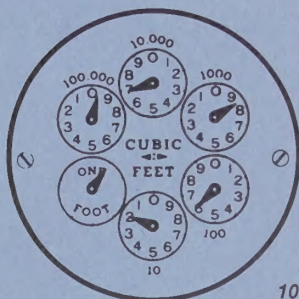

Outside the City / Charges are 1.5 times city rates. For service partially outside the City, charges are 1.25 times city rates.

Large Bills from Little Leaks / Water leaks can be costly. If you suspect a leak, you can quickly verify it by consulting your water meter which acts as a continuing register of the amount used. All water entering your home must pass through this meter. Wastage frequently occurs because of faulty functioning of toilets, faucets or sprinkler heads. Correcting such conditions will eliminate water wastage and excessive bills.

How to Locate Water Loss / First, shut off the flow of water from all fixtures supplied by the meter. Then note the location of the pointer on the dial of the lowest denomination. If this pointer

Your Water Meter and how to read it

*This meter
reads 968
in units of
100 cubic feet*

The device that registers the number of cubic feet of water you use is called the Water Meter. Water passing through your meter activates a piston which operates a set of gears connected to pointers on a bank of dials of different valuations. The positions of the dial pointers indicate the amount of water that has passed through your meter.

The pointers on the dials of some meters rotate clockwise; on others, counter-clockwise. On still others, the pointers rotate both clockwise and counter-clockwise.

To read your water meter correctly, begin with the dial of the highest denomination and write down the smallest number the pointer has last passed. Repeat this procedure on the balance of the dials, reading in order, the dials of each succeeding lower denomination. The number you obtain is the meter reading.

(Your water rate is based on units of 100 cubic feet, therefore disregard the dials which show a maximum of 1, 10 and 100 cubic feet. These are for testing only.)

If the pointer is directly on a number, for example 7 on the dial for 10,000 cubic feet (above), it must be read as 6, unless the pointer on the 1,000 cubic foot dial has passed 0.

(One hundred cubic feet of water is the equivalent of 748 gallons, or 2,992 quarts.)

ATER SYSTEM MO

Purchased Water Adjustment / Commodity charge rates are subject to a varying incremental adjustment, calculated bi-monthly and based on the cost of water purchased from the Metropolitan Water District or other independent supplier.

Lifeline Service Provision / Any customer 62 years of age or older receiving domestic water service through a 1-inch or smaller meter, and residing in a household where the combined adjusted gross annual income is less than \$7,500, is eligible for a lifetime discount of 50% on all charges for water usage up to 900 cubic feet per month (1800 cubic feet bi-monthly). To apply for the discount, or to obtain further information, visit any DWP Commercial Office, or call 481-5411 in the Los Angeles or Harbor areas, or 785-8311 in the West Los Angeles or San Fernando Valley areas.

moves one-fourth of the way around in 10 minutes, there is so much waste that you are paying about \$3.22 more a month than you ought to be paying. If the leakage cannot be located at any known point, such as water faucet or toilet, call a plumber immediately.

Wastage Results / Based on carefully prepared tests made under the average water pressure for the City of Los Angeles (approximately 55 lbs. per square inch), the table in the column at the right indicates water wastage costs at city rates, sizes of leak openings and total water wastage.

MONTHLY RATES

PRIVATE FIRE PROTECTION SERVICE

Minimum Charge (City Rates)

Includes up to 200 cu. ft. of water

Size of Service

2 inch	\$ 5.95	12 inch	\$ 77.65
